

QH441HS TECHNICAL SPECIFICATION

DATASHEET

Sandvik QH441 HS is a tracked, self contained cone crusher with an on board diesel engine. Sandvik CH440 cone crusher is at the heart of this world leading piece of crushing technology. It is equipped with a hydroset system which provides CSS adjustment at the touch of a button. The automatic setting regulation system not only optimizes production, it also keeps track of liner wear, thus making it easy to plan liner changes and minimize interruptions in production.

Sandvik QH441 HS represents the perfect marriage of advanced cone crusher technology and tracked mobility, now available with a single deck, hanging screen which allows the machine to produce a screened product and recirculate the oversize back into the feed conveyor. Alternatively the oversize conveyor can be hydraulically rotated through 90° to stockpile onto the floor to produce two products.
