

# REPLACE OR REPAIR? FAST, RELIABLE SOLUTIONS

## SANDVIK COMPONENT SOLUTIONS – BOOMS AND FEEDS

Booms and feeds are crucial components of underground face drilling rigs, so Sandvik make it as straightforward as possible to repair or replace them. At the same time, we understand that every operation's needs are individual and unique. Therefore, we've developed a range of solutions suitable for every situation – letting you avoid the risks and time demands of attempting repairs on your own.

If under-performing or worn-out booms or feeds are causing delays in your mining schedule, you might assume that your choice is either to replace those components or ask us to repair them. These options are of course available to you, but Sandvik have a spectrum of intermediate options that may suit you better.

The New for Old solution, for example, is an excellent way to replace exhausted parts. It provides genuine, high-quality Sandvik booms and feeds at a reduced price, when you return your used components. In this way, you are assured of the highest quality replacement booms and feeds with minimal downtime at a discounted price.

REGARDLESS OF WHICH SOLUTION YOU CHOOSE,  
WITH SANDVIK COMPONENT SOLUTIONS YOU'RE  
ASSURED OF:

- High productivity for your drill rig, by using the highest quality OEM components
- Reduced downtime with reliable and long-lasting booms and feeds
- Reduced injury risk because of robust components and fewer repair interactions
- Forecasting and planning ensure shorter lead times
- 6-month full warranty on all Sandvik component solutions

# BOOMS AND FEEDS — THE RIGHT SOLUTION FOR YOU

The right solution can depend on many different factors – the age, condition and application of your booms and feeds, as well as the goals and priorities of your company. For this reason, Sandvik have developed a range of approaches.

## SOLUTIONS

## KEY FEATURES

### NEW

You'll receive a top-quality, long-lasting Sandvik boom or feed, ensuring higher productivity and maximum reliability.

### NEW FOR OLD

A new Sandvik boom or feed can be purchased at a reduced price, just agree to send us your old worn out one.

### COMPONENT EXCHANGE

We'll exchange your boom for an as-new Sandvik replacement, re-manufactured to our stringent standards and equipped with the latest safety updates and product improvements.

### COMPONENT REPAIR AND RETURN

We inspect and repair your original boom or feed in one of our state of the art workshops using genuine parts to meet your pre-specified scope.

### FIXED PRICE REPAIR AND RETURN

High quality inspections and repairs at a pre-agreed price and to an agreed standard and scope.
