INTRODUCING SANDVIK WX6500 SCREENING MEDIA

At last there’s a screening media that surpasses expectation. With Sandvik WX6500, you no longer have to choose between accuracy and durability. You simply get both. Here are some of the many benefits Sandvik WX6500 is rolling out.

**HIGH SIZING ACCURACY**

Sandvik WX6500 has the same accuracy as wire mesh, but for the very first time, you can choose a rubber media for fine screening.

**HALF THE NOISE**

In operation, Sandvik WX6500 produces 50% less noise than wire mesh. Your ears will thank you.

**TWO DIMENSIONS ARE ALL YOU NEED**

Sandvik WX6500 has all the advantages of rubber screening media, but none of the complexity. The length and width of the panel deck are all that’s needed for a perfect fit.

**THE WEIGHT OF MESH**

Sandvik WX6500 weighs only a third as much as wire mesh, which greatly simplifies handling and installation. No lifting tools are required.

**FASTER INSTALLATION**

Sandvik WX6500 needs changing far less often than wire mesh. And when you do change it, the change can be made in just half of the time.

**WORK HAZARDS**

Smooth, flexible, and delivered as a roll, Sandvik WX6500 has no sharp edges to catch, cut, or scratch. It’s easy to store and move around site — and easy on whoever installs it.

**FEWER MEDIA CHANGES**

With ten times the durability of wire mesh, Sandvik WX6500 gets changed significantly less often, so you experience far less screen downtime.

**LESS BLINDING AND PEGGING**

The thinness and flexibility of the material prevents the blinding and pegging associated with wire mesh. Sandvik WX6500 gets you the end product you want — the first time through the screen.

**FEWER OPERATING STOPS**

Because Sandvik WX6500 blinds and pegs less, you avoid frequent media inspections. You spend less time on troubleshooting and replacements and more time producing.

**HIGH SIZING ACCURACY**

Sandvik WX6500 has the same accuracy as wire mesh, but for the very first time, you can choose a rubber media for fine screening.

**HALF THE NOISE**
