

# MY FLEET STAY CONNECTED

## RETROFIT KITS

Now available as a retrofit kit, Sandvik MY FLEET remote monitoring system will help you take control of your equipment. With access to a wealth of machine data at your fingertips you will be able to plan, run and service your equipment more efficiently.

Retrofit kits will be available for all 1 Series Q Range mobile crushers and screens and tracked U Range units thereafter.

With our retrofit kit, you will have access to MY FLEET Premium. This is the most comprehensive package, providing you with a wide array of parameters enabling you to eliminate the guesswork and provide the hard data required to make informed business decisions.

## DATA AVAILABLE 24/7

This data is all accessible online 24/7 365 days a year via our cloud solution. This features your customizable dashboard and is responsive for ease of use.

Access to the portal is included for the first year.  
After the first year there will be an annual data fee.
