The UH316 is a secondary crushing unit fully assembled on a single trailer frame consisting of a XS86 three deck vibrating screen and CH430 cone crusher.

The Sandvik Hydrocone crusher used on UH316 is of an advanced design, capable of high capacity operation and high reduction efficiency. With hydraulically adjustable settings, a choice of different crushing chambers and throws plus many high performance features, the UH316 is versatile, user friendly and highly productive. The compact and easy-to-service design makes it the perfect choice for mobile installations.

**KEY BENEFITS**

- With thicker side plates and a large mechanism provided with the XS screen, it makes the UH316 ideal for primary crushed material to be fed to the screen first
- This unit has been designed to produce 1 - 4 products depending on the customer’s requirements.
- The cone crusher can be fed by three ways
  - From the top and second deck of the screen
  - From the top deck of the screen. Second deck material to by-pass the crusher, fully or partially. **as product**.
  - From the previous crusher feed belt conveyor
- The operator’s platform has handrails and an access ladder from the ground.
- Compact design with easy access to all equipment.
- Safety guards are fitted over the crusher drive.
- Easy and quick displacement between job sites.
- All the feed, discharge and connection chutes are robust constructions, made of steel plate with liners.
- Self-contained electrical switchgear cabinet on board for power distribution to all of the motors on board the unit as well as the feed and product conveyors. Soft starter provided for starting of the crusher. A junction electrical box is wired on board.
- Emergency stop push buttons are provided at appropriate places.
