

SIMPLE YET SOPHISTICATED REMARKABLE RETURNS

SANDVIK LH400T

BUILT TO MAXIMIZE PRODUCTIVITY IN YOUR TOUGHEST APPLICATIONS

Sandvik LH400T is engineered for productivity and reliability, even in your toughest underground mining conditions. Featuring a capacity of 10,000 kilograms, Sandvik LH400T isn't only robust and reliable – it's also easy to operate and maintain.

ENGINEERED TO WITHSTAND THE ELEMENTS

Withstanding temperatures of more than 40 degrees Celsius, Sandvik LH400T operates efficiently in the most extreme dusty, hot and harsh conditions. Sandvik LH400T thrives in wet and muddy conditions. It performs productively in up to one meter of water. Engineered to endure the elements and traverse challenging terrain, Sandvik LH400T also maintains a lower temperature thanks to optimized air circulation and cooling capacity.

HIGHEST BREAKOUT FORCE EVER BUILT

Designed to have the highest breakout force on the market, Sandvik LH400T boasts best-in-class capacity for its bucket size. It is tested and approved according to international standards. With ample power and endurance, this loader is designed for longevity, reliability and simplicity. Sandvik LH400T delivers a larger payload for a lower cost per ton and increased utilization.

STRONGER SERVICE, SMARTER SAFETY

UNRIVALED AFTERMARKET SERVICE AND SUPPORT

In addition to being an equipment supplier synonymous with reliability and efficiency, we deliver you additional value and peace of mind through our aftermarket support. Our service solutions, including parts and training, ensure that your productivity remains peak. When you need scheduled and unscheduled maintenance, we'll provide it promptly and efficiently. We also provide training and familiarization for all our products so operators and maintenance staff alike can maximize utility.

INTELLIGENT DESIGN TO SIMPLIFY SAFETY

Safety is always top priority for us at Sandvik, and we've designed Sandvik LH400T to combine safety with intelligent simplicity. Without sacrificing any crucial features, Sandvik LH400T is the easiest-to-operate loader we've ever engineered. We've excluded unnecessary features to create a robust loader that is simple, safe and reliable. The ROPS/FOPS canopy is one of the features that contributes to a safer working environment.

ADVANCED DESIGN, LOWER COST OF OWNERSHIP

LIGHTER BODY, BETTER FUEL ECONOMY

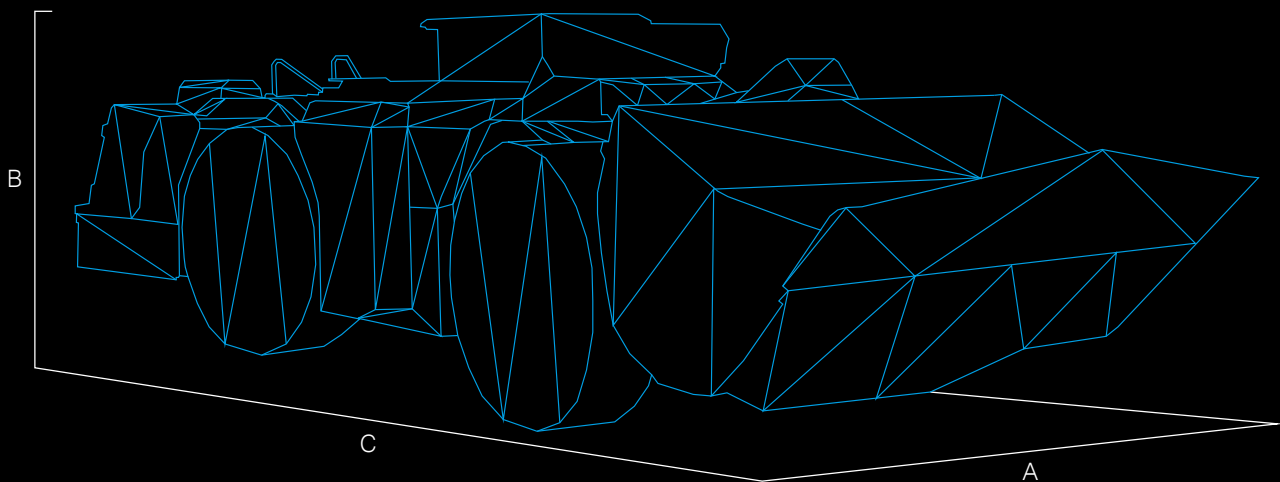

We've engineered Sandvik LH400T to be 3,000 kilograms lighter than competing loader models, so it consumes significantly less fuel. A streamlined design helps Sandvik LH400T navigate in tight spaces while its strong frame ensures durability. You'll get higher payloads in a smaller envelope size, maximizing your return on investment.

EASIER ACCESS FOR EASIER MAINTENANCE

Sandvik LH400T is quicker and easier to maintain. The crucial components are strategically placed in order to minimize potential machine failure due to deep water or extreme conditions, while also enabling faster access. This enables you to focus your attention on productivity. The loader itself is not only easy to use and operate, the simplified layout ensures reduced maintenance time and cost.

PRODUCT INFORMATION

A. Width – Total (m)	2.70
B. Height – Total (m)	2.38
C. Length – Total (m)	9.80
Capacity – Trimming (kg)	10,000
Weight – Operating (kg)	28,500
Bucket – Range (m ³)	4.0-5.5
Breakout Force – Lift (kg)	20,400
Breakout Force – Tilt (kg)	18,900
Engine Power (kW)	204
Driving Speed – Max. (km/h)	23.5
