SANDVIK TH551i
SAFER. STRONGER. SMARTER.
Efficient ore moving and lower costs
The highly maneuverable Sandvik TH551i with low own weight, 51 tonnes payload capacity and high ramp speed enables an efficient ore moving process. In addition to boosting productivity, reduced own weight also results in reduced fuel consumption and less tire wear, lowering equipment total operating costs.

Full utilization of the truck capacity
With wide range of box options, you can achieve the truck’s rated capacity. Sandvik dump boxes are already designed with extra volume when selecting the right box for your broken material density. A built-in 90% fill factor in box selection ensures the truck can be loaded to its true rated capacity and reduces spillage during tramming. The smooth box design improves material flow during dumping, while the reinforced steel structure uses wear resistant steel for extended box lifetime. Optional ejector box is available for backfilling and unloading in areas of restricted dump height.

Production monitoring
To ensure maximum utilization of the rated payload on every trip, Sandvik TH551i can be equipped with Sandvik’s Integrated Weighing System (IWS) for trucks. For an accurate result, the IWS considers the environmental temperature and the truck’s inclination angle and is equipped with three-point measurement of the loaded weight in the box. Real-time weighing and signal lights – red, orange and green – advise the loader operator to ensure the rated capacity is reached before moving forward.

In addition to accurately measuring the payload when loading the box, the IWS records the results to My Sandvik Digital Services Knowledge Box™. The Knowledge Box™ can transfer this production monitoring data through Wi-Fi connection for customer access via My Sandvik internet portal. Alternatively, data can be downloaded manually in the operator’s compartment onto a USB stick.
READY FOR DIGITALIZATION

AUTOMINE®
AutoMine® is the industry leader in automation for underground loaders and trucks. This high-performing, comprehensive solution is working around the world, backed by Sandvik experts across the globe.

AutoMine® readiness is built into Sandvik TH551i for faster retrofitting later in the truck’s lifetime. To maintain a fast retrofit time, the AutoMine® Onboard Package now has one small enclosure and electrical quick connectors for fast installation, and no hydraulic changes are needed. All sensors have increased protection from rock fall. With AutoMine®, a fleet of Sandvik TH551i is converted into a high performing autonomous production system, providing significant safety and productivity improvements for mine operations.

OPTIMINE®
Take optimization further with OptiMine®, the powerful suite of digital tools for real time visualization, analysis, and optimization of mining production and processes. OptiMine® integrates all relevant data into one source, delivering both real-time and predictive insights to improve operations. OptiMine® is open, OEM independent and scalable, providing the flexibility to add on and incorporate other equipment, systems, and networks.

KNOWLEDGE BOX™
The Knowledge Box™ onboard Sandvik TH551i transfers monitoring data through a Wi-Fi connection to the My Sandvik internet portal for visualization of fleet health, productivity and utilization. Transferred data can also be used by OptiMine®, an analytics and process optimization suite to improve mining process efficiency.

PROXIMITY DETECTION SYSTEM INTERFACE
A Proximity Detection System (PDS) interface option is also available on Sandvik TH551i for mines to interface with their site PDS system. The PDS interface offers easy installation and connection to the Sandvik Intelligent Control System with the capability to slow down and stop the truck on the signal from a proximity detection system.

MY SANDVIK DIGITAL SERVICE SOLUTIONS 365
My Sandvik Digital Service Solutions are designed to help you maximize your productivity, operational efficiency and safety. Once activated, the Knowledge Box™ on board Sandvik TH551i collects and transfers equipment data into easy-to-use knowledge about your fleet’s performance in the form of dashboards.
CABIN COMFORT
Comfortable working conditions contribute to utilizing the truck’s full capacity. This industry leading cabin offers premium ergonomics, low noise and a controlled temperature environment through air conditioning, dust and noise resistant upholstery materials, and a significant number of adjustment possibilities.

FOR OPERATOR SAFETY
The cabin is ROPS and FOPS certified to protect the operator in case of roll over or falling objects, has 3-layer laminated safety glass windows, illuminated cabin entrance with three-point contact handles and anti-slip steps and emergency exits. The door system features a magnetic interlock switch, which automatically applies brakes when the door is opened.

SMOOTH RIDE OVER ROUGH TERRAIN
Front frame suspension provides a smooth ride for the operator even on a rough terrain, supporting full utilization of the trucks speed and capacity.

COMFORTABLE SEATING
The operator’s seat has low frequency pneumatic suspension, adjustable arm rests and lumbar support, selectable damping and adjustable steering wheel, to name a few of the adjustments. Additionally, the cabin incorporates a trainer seat with three-point safety belt.

BEST IN CLASS VISIBILITY
Flat equipment covers help to achieve a good visibility from the cabin, supported by efficient, adjustable LED lights as standard. A 5.7” LCD color display with adjustable contrast and brightness has all the needed information and alarms on one display, giving the operator more time to keep eyes on the road. Further, the truck is equipped with reversing and right hand side cameras as standard. In cold conditions, an optional arctic package helps to keep windows and mirrors free of ice and mist.

FIRE SAFETY
To reduce fire risks, fire prevention features have been designed in the equipment. To name a few solutions, the turbo charger, the double wall exhaust manifold, and the fuel tank are all covered. A remote circuit breaker is located in the cabin for isolating the batteries and electric system in case of fire.

For fire suppression, Eclipse™ from Sandvik is available as an option. The Eclipse™ equipped with Sustain fire suppression agent is a sustainable choice, as it is a fluorine-free fire suppression liquid. For environmental conditions where the temperature may drop under zero, the Eclipse™ Extreme provides fire protection.

SUPERIOR OPERATOR ENVIRONMENT & SAFETY
MAINTENANCE FRIENDLY

Sandvik TH551i is designed for ground level daily maintenance. When getting to the top of the equipment is required, the access systems provide a steady grip, including 3-point contact high contrast handles and anti-slip steps. The top covers are perforated to reduce risks for slipping, and where perforation is not practical, anti-slip tapes are fitted. Standard features improving safety of maintenance work include lockable main switch, started isolator switch, articulation lock, box support and wheel chocks, among others. Optionally available safety rails improve safety on top of the equipment, and they are recommended for all conditions.

SMART MAINTENANCE

To minimize the need to move around the machine or use special tools, Sandvik Intelligent Control System with the 5.7” touch screen color display provides service information, easy system diagnostics and alarm log files. For example, for identifying the need for a filter change, the control system monitors the condition of engine air filters as well as hydraulic and transmission filters. An automatic brake test with diagnostics and logging can also be performed from the display.

EASY FUEL FILTER FILLING

Filling up fuel filters can be easily done by pushing a button instead of doing the work manually. Potential fuel spills are collected on a tray under the filters, from where the fuel can be drained to a container, avoiding spills to the ground.

MAINTENANCE KITS AND PERFORMANCE FLUIDS

Tailor-made maintenance kits include all relevant parts and other materials for planned maintenance.

Sandvik Performance Fluids preserve the machine’s high performance. Smooth operation throughout its lifetime can be ensured with Sandvik Long-Life Engine, Transmission and Hydraulic Oils, which are available in different viscosity grades.
ACCURATE OIL SAMPLING
Monitoring the condition of the equipment fluids helps to understand component health and enables informed maintenance decisions to extend the equipment lifetime and reduce total lifecycle cost. Sandvik TH551i live oil sampling option enables taking oil samples when the engine is running, contributing to accurate results. Naturally, all oils are easy to drain with hoses or with the optionally available Wiggins quick fill system.

SAFER AND FASTER TYRE CHANGE
For a safer and faster method to jack up the truck in case of tyre failure, the optional integrated jacking system is at your service. The hydraulic system can jack up the truck even when the box is fully loaded. The jacking system is operated with a remote controller.
LOW COST PER TONNE

FUEL EFFICIENT VOLVO ENGINE WITH LONG ENGINE LIFETIME
A fuel efficient 515 kW Stage II / Tier 2 Volvo engine offers long engine lifetime and low cost of ownership. Equipment low own weight, efficient engine technology, fast ramp speeds and up to 25% lower fuel consumption compared to competition result in low cost per hauled tonne. Reduced fuel consumption also supports reduction of CO2 emissions. The exhaust system is well protected with covers to contribute to long lifetime.

BEST IN CLASS MSHA AND CANMET VENTILATION RATES
The optional 515 kW Tier 4i engine from Volvo offers best in class MSHA and CANMET ventilation rates with Ultra Low Sulphur Diesel fuel. The exhaust after treatment system consists of a selective catalytic reduction system (SCR) using diesel exhaust fluid to reduce emissions of nitrogen oxides. The SCR delivers compliance with Tier 4i emissions regulations, without sacrificing performance and fuel efficiency.

MINIMIZED TRANSMISSION AND BRAKE WEAR
Sandvik TH551i engine has a combined engine brake and transmission retarder as standard, minimizing brake and transmission overheating and brake wear. Activated automatically, the engine brake provides smooth and responsive braking to control vehicle speed downhill.

OPTIMIZED GREASE CONSUMPTION AND EXTENDED COMPONENT LIFETIMES
The standard automatic central lubrication system optimizes grease consumption and extends the life of the bushes and bearings. In addition to extending component lifetime, the central lubrication system improves safety. Activated by Sandvik Intelligent Control System when the parking brake is released, hard to reach areas are well lubricated and service time is reduced.

EFFICIENT COOLING FOR INCREASED PERFORMANCE
Separate brake, hydraulic, transmission and transfer box cooling provide increased performance in hot conditions underground. A more efficient cooling circuit results is lower oil temperatures, reducing stress on the system, extending component lifetimes, and minimizing oil leaks.

LONGLIFE STEEL PIPING
Extensive use of hydraulic steel piping throughout the truck delivers longer lifetime and easier maintenance access than hydraulic hoses. Stainless steel piping is used extensively for corrosion protection. Zinc aluminum coated fasteners throughout the truck provide corrosion protection and prevent seizing. For aggressive operating environment, a harsh conditions package is available as an option, including a water cooled alternator, among others.
PROUDLY KEEPING YOU ON TRACK!
Sandvik 365 Parts & Services offer a variety of possibilities to enhance your Sandvik TH551i truck’s performance. As an OEM, we provide the best-suited choices to preserve your machine’s high performance throughout its lifetime. These consist of highly skilled service specialists supporting you 365 days a year, all using Sandvik Genuine parts and components complemented by a range of robust tools. In addition, you get to enjoy the benefits of advanced digital services and a global infrastructure dedicated to keeping your Sandvik fleet on track.

BENEFIT FROM OUR 365 SOLUTIONS
Our Sandvik 365 Parts & Service solutions will enable your equipment to function safely at peak condition and allow you to achieve the most demanding production targets. Our aftermarket portfolio attends all possible needs throughout your equipment’s lifecycle, ranging from the most basic and traditional offerings to the most sophisticated ones.

YOUR EQUIPMENT UPTIME IS OUR FOCUS – SANDVIK 365 COMPONENT SOLUTIONS
We have all your key components available to you under our various commercial offerings to suit your needs. Whether you have an ad-hoc failure or you are planning your maintenance in advance – we can assist, manage your components to maximize your uptime.

MAXIMIZE YOUR PRODUCT LIFETIME WITH SANDVIK 365 REBUILD SOLUTIONS
One of the most effective ways to optimize equipment lifecycle lies in the quality and range of the Sandvik Rebuild Solutions. Planning and executing rebuilds at optimal intervals helps you keeping your equipment’s operating cost and productivity on track. A rebuild by the manufacturer can optimize your total cost of ownership (TCO) and increase the level of predictability around our fleet lifecycle.

CHOOSE FROM OUR RANGE OF SERVICE AGREEMENTS
With Sandvik Service Agreements, you can improve productivity and minimize unplanned downtime by making use of our expertise, systems and processes. They can be adapted to the specific level of support you require – helping you proactively manage your fleet and avoid any unexpected surprises.

GAIN PRODUCTIVITY THROUGH CONNECTIVITY
365 My Sandvik Digital Service solutions will provide you with visualization of fleet utilization, productivity, safety and health on 24/7 basis. The digital service dashboards can be accessed through the My Sandvik customer portal, where you can subscribe to My Sandvik Insight or Productivity. This way, My Sandvik Digital Service Solutions enable you to minimize unplanned downtime and set exact targets for improvement.
TECHNICAL SPECIFICATION 
SANDVIK TH551i

Sandvik TH551i is a high productivity 51 tonne articulated underground dump truck for use in 5 x 5 meter haulage ways.

This intelligent truck is a safer, efficient, high capacity and easy to maintain underground truck for optimized fleet management.

Sandvik TH551i truck features a wide range of intelligence integrated technology, such as Sandvik Intelligent Control system, My Sandvik Digital Services and Automation Readiness as standard, supplemented with Onboard Weighing System option for tracking the payload. With the latest addition of the AutoMine® Trucking Onboard option, Sandvik TH551i enables autonomous haulage for both transfer level and decline ramp application.

Sandvik TH551i offers a reliable and safer solution that can significantly increase the efficiency and productivity of operations while decreasing the cost per tonne, providing smart productivity.

Operator safety, health and comfort are enhanced by the mining focused, sound suppressed, ROPS and FOPS certified cabin.

OPERATIONAL CONDITIONS AND LIMITS

- **Environmental temperature**: From -20°C to +50°C
- **Standard operating altitude**: With engine Volvo TAD1642VE-B from -1500 m to +1000 m at 25 °C without rated power derate

REQUIREMENTS AND COMPLIANCE

- Compliance with 2006/95/EC Low voltage directive
- Compliance with 2004/108/EC Electromagnetic compatibility directive
- Design based on MDG 15. Guideline for mobile and transportable equipment for use in mines. (Equipment for Australia, achieved with relevant options)

- Electrical system based on IEC 60204-1. Safety of machinery – Electrical equipment of machines – Part 1: General requirements
- CONTAINS FLUORINATED GREENHOUSE GASES
  - Refrigerant R134a under pressure max 38 bar/550 PSI:
  - Filled weight: 1,500 kg
  - CO2e: 2,145 tons
  - GWP: 1430
  - Information based on the F Gas Regulation (EU) No 517/2016

POWER TRAIN

**ENGINE**
- Diesel engine: Volvo TAD1642VE-B (Tier 2)
- Engine brake: Yes
- Output: 515 kW (691 hp) @ 1900 rpm
- Torque: 3221 Nm @ 1300 rpm
- Number of cylinders: In-line 6
- Displacement: 16.1 l
- Cooling system: Liquid cooled
- Combustion principle: 4-stroke, direct injection, turbo, after cooler
- Air filtration: Dry type
- Electric system: 24 V
- Emissions: Tier 2, Euro Stage II
- Ventilation rate (Ultra low sulphur diesel): CANMET 48,100 CFM m3/s, MSHA 45000 Ventilation Rate
- Particulate index (Ultra low sulphur diesel): MSHA Particulate Ventilation Index 5,000 CFM
- Exhaust system: Catalytic converter with muffler
- Average fuel consumption at 50% load: 46.0 l/h
- Fuel tank capacity: 840 l

CONVERTER

- Allison with lock-up

TRANSMISSION

- Fully automatic transmission with electric shifting system and retarder: Six gears forward and one reverse
- Allison 6625

UP BOX

- Katsa
  - Ratio: 1:1

DROP BOX

- Katsa
  - Ratio: 1:1

AXLES

- Front axle: Kessler D106 series, spring applied hydraulic operated brakes, hydraulic suspension
- Rear axle: Kessler D106 series, spring applied hydraulic operated brakes, fixed

TIRES

- Tire size (Application approved. Brand and type subject to availability): 35/65 R33 -E4

OPERATOR’S COMPARTMENT

CABIN

- ROPS certification according to EN ISO 3471
- FOPS certification according to EN ISO 3449
- Sealed, air conditioned, over pressurized, noise suppressed closed cabin
- Sound absorbent material to reduce noise
- Laminated glass windows
- Cabin mounted on rubber mounts to the frame to reduce vibrations
- Air conditioning and heating unit as a standard
- Cyclone pre-filter for A/C device
- Adjustable steering wheel
- No high pressure hoses in the cabin
- Inclinometers to indicate operating angle
- Emergency exit
- Illuminated steps to the cabin
- Three-point contact access system with replaceable and colour coded handles and steps
- 12 V output
- Remote circuit breaker switch
- Mirrors defrost
- Trainer’s seat (behind operator)

CONTROL SYSTEM, DASHBOARD AND DISPLAYS

- Sandvik Intelligent Control System
- Critical warnings and alarms displayed as text and with light, warnings and alarms recorded to the control system log
- 5.7” display with adjustable contrast and brightness
- Instrument panel with illuminated switches
- My Sandvik Digital Services Knowledge Box™ on-board hardware
- AutoMine® Trucking readiness

OPERATOR’S SEAT

- Low frequency suspension
- Height adjustment
- Adjustment according to the operator’s weight
- Fore-aft isolation
- Padded and adjustable arm rests
- Adjustable lumbar support
- Selectable damping
- Four-point seat belt on operator’s seat
- Three-point seat belt on trainer’s seat
MEASUREMENT VIBRATION LEVEL

Whole body vibration was determined while operating the truck in a simulated working cycle consisting of loading, unloading and driving with and without load. The value is determined applying standards EN 1032 and ISO 2631-1.

<table>
<thead>
<tr>
<th>Parameter</th>
<th>Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>Maximum r.m.s. value $a_w$ [m/s²]</td>
<td>0.69 (driving with load)</td>
</tr>
<tr>
<td>VDV$_{15}$ over 15 min period [m/s¹⁵]</td>
<td>8.37 (driving with load)</td>
</tr>
</tbody>
</table>

MEASUREMENT SOUND LEVEL

The sound pressure level and sound power level at the operator’s compartment have been determined in stationary conditions on high idle and at full load, with engine Volvo TAD1642VE:

<table>
<thead>
<tr>
<th>Parameter</th>
<th>Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sound pressure level $L_{pa}$ [dB re 20 μPa]</td>
<td>75 dB</td>
</tr>
<tr>
<td>Sound power level $L_{wa}$ [dB re 1 pW]</td>
<td>121 dB</td>
</tr>
</tbody>
</table>

FRAME

REAR AND FRONT FRAME

High strength structure with optimized material thicknesses. Reduced own weight for higher overall hauling capacity and long structural lifetime. Welded steel construction.

Automatic central lubrication

Central hinge with adjustable lower bearing

Tanks are stand alone structures and bolted onto main frame

ELECTRICAL EQUIPMENT

HYDRAULICS

Filling pump for hydraulic oil

Door interlock for brake hydraulics

Oil cooler for hydraulic and transmission oil, capability up to 55°C ambient temperature

ORFS fittings

Hydraulic oil tank capacity 280 l

Sight glass for oil level, 2 pcs

STEERING HYDRAULICS

Fully hydraulic, center articulated, power steering with two double acting cylinders. Closed-center system with a load-sensing piston pump and pilot operated orbital wheel steering.

Steering main valve | Player operated |
Steering hydraulic cylinders | 140 mm, 2 pcs |
Steering pump | Variable displacement piston pump |

DUMP BOX HYDRAULICS

Fully hydraulic system, equipped with variable displacement piston pumps. Oil flows to box hydraulic system from the steering hydraulics. Oil flow from the brake circuit pump is divided to the brake system and oil cooler motor.

<table>
<thead>

</tbody>
</table>

BRAKES

Service brakes are spring applied, hydraulically operated multi disc wet brakes on all wheels. Two independent circuits: one for the front and one for the rear axle. Service brakes also function as an emergency and parking brake. Brake system performance complies with requirements of EN ISO 3450, AS2958.1 and SABS 1589.

Neutral brake

Automatic brake activation system, ABA

Electrically driven emergency brake release pump

Foot operated brake pedal valve, fully modulated

Brake oil tank capacity, 100 l

ILLUMINATION

Illuminance $E_{av}$ with 2 pieces of 50 W led lights at a distance of 20 m in front of the truck:

<table>
<thead>
<tr>
<th>Component</th>
<th>Specification</th>
</tr>
</thead>
<tbody>

</tr>
</tbody>
</table>

Sandvik TH551i is compliant with the South African Mine health and safety act 29 of 1996, as the average light intensity in the direction of travel is more than 10 lux at a distance of 20 m.

INCLUDED SAFETY FEATURES

FIRE SAFETY

Portable fire extinguisher, 12 kg

Hot side - cold side design

Isolation of combustibles and ignition sources

Heat insulation on exhaust manifold, turbo, and isolated exhaust pipe

ENERGY ISOLATION

Lockable main switch, ground level access

Starter isolator

Emergency stop push buttons according to EN ISO 13850: 1 pc in cabin, 1 pc in front frame, 2 pcs in rear frame

Pressure release in the radiator cap

Automatic discharge for pressure accumulators (brake system and pilot circuit)

Frame articulation locking device

Mechanical dump box locking device

Wheel chocks and brackets

Sandvik TH551i 13
MATCHING PAIR SANDVIK TH551i AND SANDVIK LH517i

Be safer, be stronger, and be smarter – together.

Sandvik LH517i is a high capacity loader for 5 x 5 meter mining tunnels. With superior hydraulic power for fast bucket filling and drivetrain power for high ramp speed, Sandvik LH517i is designed to quickly clear tunnel headings for rapid advance rates.

Sandvik LH517i is equipped with fuel efficient 310kW Tier 2 / Stage II engine as standard. A 315kW Tier 4f / Stage IV low emission engine option is available with the use of Ultra Low Sulphur Diesel fuel. This optional engine comes with an engine break.

This intelligent loader features many improvements in operator and maintenance ergonomics. The already high level of safety has been further increased to make the operation and maintenance more fluent.

Higher productivity and profitability is achieved by better balanced machine and larger bucket size. Rebalancing makes the bucket filling easier and reduces tire wear. Combined with unique bucket filling, Sandvik LH517i can boost operations to the next level.

Sandvik LH517i has integrated intelligence in the form of Sandvik Intelligent Control system, My Sandvik Digital Services Knowledge Box™ on-board hardware and automation readiness. Additional examples of available options are Integrated weighing system and AutoMine® Loading Onboard Package.

### CAPACITIES
